

Grasses

*Lots of grasses in the flower meadow in June
Here are a few varieties – all good hay crops*

Cock's Foot

*tall with purple-tinged flower heads much
favoured by the Meadow brown, Hedge
brown and Ringlet butterflies*

Rye grass a good belly filler for horses apparently

Meadow grass

*the Poa family has about 500 species not all
common to the British Isles and certainly not
our meadow!*

*Yorkshire fog with its velvety grey-
green leaves and purple-tinged flower
heads favoured by the Speckled wood
butterfly*
