

Butterflies & Moths

First butterfly this year, for me, was
on 24 March (a date to remember!) a
Brimstone

During those wonderfully sunny days at the start of
the lockdown there were loads of
Peacock Butterflies as well as

Orange Tips

and Large and Small Whites

And blues - probably Common Blues in the grassy habitats and gardens But
maybe Holly Blues which prefer woodlands, woodland edges and hedges

Common Blue

and Holly Blues, female often more marked with black

Others to look out for in May

Speckled Wood

Painted Lady

Red Admiral
