

Butterflies & Moths

Butterflies to look out for in the park and your garden this month of July except maybe the Orange Tip and the Blues

Comma
with its unique ragged outline

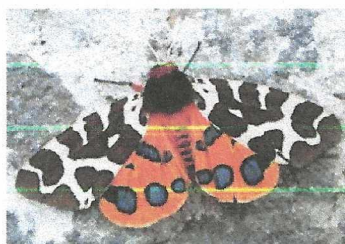

Small Tortoiseshell
the Large Tortoiseshell is now thought to be extinct

Peacock
well named after its eyes

Look out for them on buddleias and other nectar-rich flowers

And a moth

Garden Tiger
seen by Colin near the cricket sight screens

And butterflies pictured in May and June - most still around

Brimstone

Ringlet

Gatekeeper/Hedge Brown

Meadow Brown

Large and Small White

Orange Tip

Speckled Wood

Common Blue

Small Blue

Painted Lady

Red Admiral

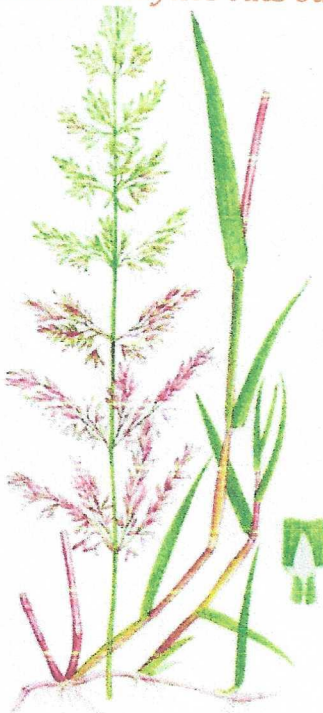

If you're interested in butterflies - have you been to Bernwood Forest – beyond Horton-cum-Studley

Grasses

You'll maybe have noticed haymaking going on last month when grasses are at best food quality for stock. However, as ours is a wild-flower meadow it's cut when most of the flowers have set seed. Farmer Haynes cuts ours end of August into September

9. Common bent
Agrostis capillaris

10. Creeping bent
Agrostis stolonifera ●

11. Red fescue
Festuca rubra ●

13. Rough meadow-grass
Poa trivialis ●

14. Annual meadow-grass
Poa annua ●

15. Smooth meadow-grass
Poa pratensis ●

..... Common meadow grasses

Grasses

Guide to common grasses

Species marked ● are often found in playing fields and lawns

1. Italian rye-grass
Lolium multiflorum

2. Perennial rye-grass
Lolium perenne ●

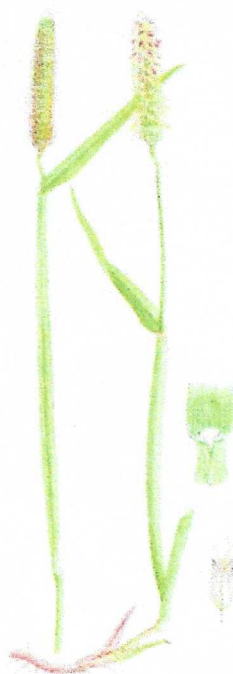

3. Crested dog's-tail
Cynosurus cristatus ●

4. Cock's-foot
Dactylis glomerata

5. Yorkshire fog
Holcus lanatus

6. Meadow foxtail
Alopecurus pratensis

7. Timothy
Phleum pratense ●

8. False oat-grass
Arrhenatherum elatius

Common meadow grasses

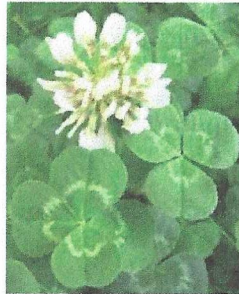

FSC

So many grasses so this month here are a couple of ready-made ID sheets

Meadow Wild Flowers

Flowers in the meadow in this month of July

First to see along the diagonal path **White Clover**
Its leaves can apparently be dried
and smoked as a herbal alternative to tobacco

Any 4-leaf clovers?

And the
tiny flowers
of the
Cut-leaved Cranesbill
member of the Geranium family

Then further along on the right
Meadow Vetchling

With its alternate narrow-bladed leaves

And still around:

Dock

Buttercup

Yellow Rattle

Red Clover

Lesser Stitchwort

Over on the left the **Bird's-Foot Trefoil**

Gets its name **Bird's-Foot** from its seed pods. And from its
leaflets – it has 5 but the central 3 stand above, thus-Trefoil

Further along is the **Common Knapweed** Nectar-rich it's in the top
5 nectar producers in the UK and much favoured by bees and butterflies

Disappointing numbers of
**Common Spotted
Orchid** this year but
Barry found this one!

Wild Flowers

Flowers in the hedges and edges in this month of July

Still around

Common Nettle

Dock

as well as lots of yellow-flowering plants which look similar but take a look at their leaves

Groundsel

Smooth sow-thistle?

Hawkweed, Hawkbit or Hawk's beard?

All members of the very large Asteraceae or Compositae family which has 32,913 species divided into 13 subfamilies but just too many to go through in the time available! The one we all know is the Dandelion.

Any experts around to tell us about the others?

With a yellow flower but not part of the above family is the Creeping Cinquefoil

found along the western edge of the park.

*Well-named with its 5-petals and 5- leaves.
The Cinquefoil emblem means strength, power, honour and loyalty.*

Wild Flowers

Hedge Woundwort/Hedge Nettle As its name suggests it has medicinal properties to promote the healing of wounds. Seen along Thornhill Path

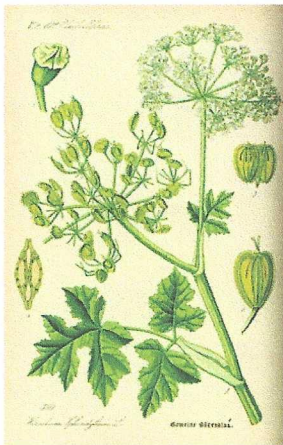

Self-heal, 5-30 cm tall, can be eaten raw in salads – contains vitamins A, C and K. Growing on the edge of the paths eg Thornhill Path

Honeysuckle in the hedges

Bramble flowers and their fruits in latesummer

Common Hogweed and its daintier relative **Wild Angelica** members of the Umbelliferous (umbrella like) family

Wild Flowers

Remember this plant in May?

Here it is now

A plant with many names: snakeshead, adder's root, arum, wild arum, arum lily, lords-and-ladies, devils and angels, cows and bulls, cuckoo-pint, soldiers diddies, Adam and Eve, bobbins, naked girls, naked boys, starch-root, wake robin, friar's cowl, sonsie-give-us-your-hand, jack in the pulpit and cheese and toast.

*The name "lords-and-ladies" and other gender-related names?
Just see what your imagination comes up with!*

Great Willowherb

*The Great Willowherb blooms
throughout July and August in our edges
One of 197 species in their family.*

*Linked to the Rosebay Willowherb named
for their willow-like leaves*

Tall, up to 2 metres, along stream banks, ditches

Wild Flowers

Thistles - another member of the Asteracea/Compositea family with over 100 different thistles worldwide and probably quite a few of them here in the park!

The national emblem of Scotland for nearly 150 years.

The biggest thistle you're ever likely to see, 8' tall, is carried through the streets at Langholm Common Riding (beating the bounds on horseback) where, if it wasn't grass-cutting time, Peter would be on the last Friday of July.

The Thistle along with the barley banna' and saut herring, and the crown, a Scottish one perhaps?

The green ties? Colours of the Derby winner of that year.
Think they might be blue this year?
