

Meadow Wild Flowers

Flowers in the meadow in this month of June

Buttercup

Dock

Cut-leaved Cranesbill

Black medic or Hop clover

Common Knapweed

Tufted Vetch

Yellow Rattle

Lesser Stitchwort

Red Clover

White Clover

Why Yellow Rattle is important in our flower meadow. In early spring the seeds germinate and grow quickly. As their roots develop underground they seek out the roots of plants growing nearby, especially grasses. Once contact is made the yellow rattle draws water and nutrients from them, suppressing the growth of grasses by as much as 60%. In the resulting space, other flowers have room to grow.
